

## Terraclip - Classic

### *Product specifications*

- Description: Clip used to join the plant to the string in order to help carrying the load of the crop and keeping the plant straight.
- Crop type: Tomatoes, cucumbers and peppers.
- Dimensions: 23mm
- Color: Dark brown
- Grip force: Strong clip, indicated for heavy crops.
- Material: The material used is a compound based mostly on PLA, certified for the OK-Industrial Compost standards (EN 13432) by TÜV-Austria.
- Durability: Terraclips are made to last one growing season, from the application on the plant until the harvest.
- Shelf-life: Terraclips can be stored up to 6 months, as long as the storage occurs:
  1. In dry place;
  2. At temperature between 5 - 40 °C;
  3. Inside the original boxes, indoor, away from direct sunlight.
